You and Your Dentist

The relationship between a dentist and a patient is one of trust and compassion. Knowing your dentist is a professional and has years of knowledge and expertise behind him or her means you can count on your dentist to know the proper procedures and treatments you will need.

Your dentist is as concerned about your dental health and comfort as you are. Maintaining a healthy dental regimen is a key part of keeping your beautiful smile.

Cosmetic dentistry is fast becoming one of the most chosen options in dentistry because the modernization of techniques has come so far. Crowns, whitening, bonding treatments and veneers are excellent options to extractions and dentures.

Available Services

MCDental Care, PLLC offers you the latest in technology and a variety of dental services for adults and children, including:

Cleanings ♦ Fillings ♦ Crowns & Bridges
Implant Restoration ♦ Cosmetic Procedures
Tooth Whitening ♦ Veneers ♦ Emergencies

An important part of our job is to assist you with any questions you may have regarding various dental hygiene issues. We are available to offer suggestions to your questions or concerns about any of the following:

Plaque Prevention ♦ Fluoride ♦ Tooth Pain
Gum Disease (Periodontitis) ♦ Dental Implants
Whitening Techniques ♦ Orthodontic Issues
Toothpaste, Rinses & Oral Care Products

The Intra-Oral Camera

The Intra-Oral Camera is a tiny video camera that creates a close-up view of the inside of your mouth. This makes it possible for you and your dentist to both see the amount of work that needs to be done to your teeth, allowing you the opportunity to take part in the decision-making process regarding your dental care program.

Restorative Dentistry

The ability to “restore” your teeth to their former condition is becoming a more popular dental choice these days. Crowns, fixed bridges, life-like dentures and tooth-colored fillings are great options. Porcelain veneers and bonding are great cosmetic procedures that can transform a smile from one of embarrassment to one of delight!

The days of “Metal Mouth” are history! Those unsightly silver/mercury amalgam fillings are fast becoming a thing of the past. White plastic-like fillings contain no metal, closely match the color of your own teeth and can even strengthen your teeth.

Porcelain veneers are a great way to change the appearance of your teeth. Gaps between teeth, discoloration and misshapen teeth can be transformed into a healthy, beautiful smile by creating thin porcelain coverings that are bonded right to your own teeth.

Everyone wants to have that eye-catching, white smile! That can be achieved either in the office with our safe, effective bleaching process that takes only about 45 minutes and has immediate results, or with our safe, at-home process that takes about 10-14 days to achieve.

MCDental Care Insurance

Who is eligible?

Enrollment is available to anyone who is not already covered by a dental insurance plan. Registration is available to both individuals and families which include children under the age of 19. Anyone over the age of 19 must register as an adult. Pre-existing conditions do not disqualify a person from membership to our plan.
